USERS' GUIDE

Catalog Arrangement and Indexes

The bibliographic entries in the *Monthly Catalog* are arranged in Superintendent of Documents classification number order. Each record is also assigned a unique catalog number, which consists of a two-digit prefix representing the catalog year, followed by a sequential number beginning with 1 in the first issue of each year. Within this arrangement, the publications of each Government author are further identified by the name and address of the issuing agency.

Catalog entries may be accessed by the following indexes:

Author index: An alphabetical list of personal authors, editors, co-authors, corporate authors, and conferences.

Title index: An alphabetical list of titles proper, subtitles, and alternate titles.

Subject index: An alphabetical list of subjects derived from the *Library of Congress Subject Headings.*

Series/Report index: An alphabetical listing of series statements and tracings, series numbers, and report numbers.

Contract number index: An alphanumeric list of contract, grant, and project numbers associated with technical report publications.

Stock number index: An alphanumeric list of Superintendent of Documents and other sales stock numbers.

Title keyword index: An alphabetical list of truncated titles, arranged by important words selected from publication titles.

A **margin index** on the back cover locates the seven indexes. Listings in all of the indexes are followed by the catalog entry number, which refers the user to the complete bibliographic citation. Listings in the **title** and **subject indexes** are augmented with the publications' author and classification number to enhance identification and retrieval. Cumulative indexes are published semiannually, annually, and quinquennially, and in addition the indexes listed above, include a **Classification number index** for all the publications listed during the period of cumulation.

Abbreviations

The abbreviations used in the bibliographic records in the catalog are those described in the *Anglo-American Cataloguing Rules,* 2nd ed., and the *GPO Classification Manual: A Practical Guide to the Superintendent of Documents Classification System.*

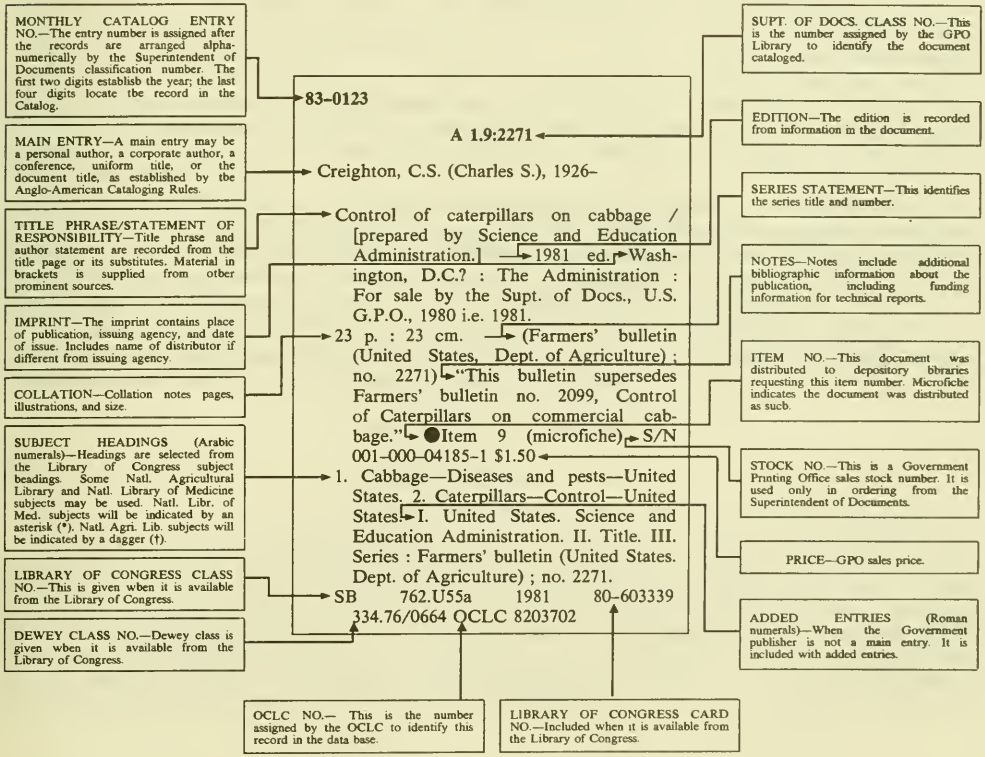

List of Government Authors

This alphabetical list in the preliminary pages of each catalog locates the beginning of the sequence of entries of documents issued by a specific agency. The list is compiled each month and contains only Government authors of documents included in that *Monthly Catalog* issue.

SAMPLE ENTRY

Monthly Catalog descriptive cataloging entries follow the precepts of the *Anglo-American Cataloguing Rules,* 2nd ed., the Library of Congress Rule Interpretations, the *GPO Cataloging Guidelines,* and the several pertinent OCLC format documents. All name and series authorities are in AACR2 format, and are established through the Library of Congress Name Authorities Cooperative Project (NACO). The subject headings used in the GPO cataloging are derived from the *Library of Congress Subject Headings,* 10th ed.

The following sample entry is an artificial, composite record, designed to illustrate the major features of a *Monthly Catalog* bibliographic citation.

SOURCES OF INFORMATION ABOUT GPO SALES PUBLICATIONS

Publications Reference File—The GPO Sales Publications Reference File (PRF) is a catalog of all publications and subscription services currently for sale by the Superintendent of Documents. It is available in 48x microfiche and on machine-readable magnetic tape. The microfiche service consists of bimonthly mailings of the complete master file (approximately 175 to 225 fiche) and monthly mailings of a single fiche listing new sales publications. The magnetic tape service consists of biweekly mailings of the complete file. An annual subscription to the microfiche is $100.00 (domestic) and $125.00 (foreign). A subscription to the magnetic tapes is $850.00 a year (domestic) or $1,062.50 a year (foreign). To order either service, use the form in this catalog. Please enter the identifying letters PRF for the microfiche or GPRFT for the magnetic tapes in the ID column on the order form.

Subscribers to DIALOG can use it to determine if a publication is for sale by the Superintendent of Documents, if the item is in stock, and its stock number and current price.

An additional service, DIALORDER, is also available from DIALOG. Subscribers to DIALOG can place an order for publications with the U.S. Government Printing Office by computer at a special charge. For additional information on DIALOG/DIALORDER, please contact:

The *Out-of-Print GPO Sales Publications Reference File* provides users with access to historical records for publications which were once available through the Sales Program. Two 6-year cumulations have been produced. The first was published in 1980 and is known as the Exhausted GPO Sales Publications Reference File (EPRF). It includes 25,000 items which went out-of-print at GPO between 1972 and 1978. The second, known as the Out-of-Print PRF (OPRF), was published in 1986. It contains 35,000 titles which went out-of-print between 1979 and 1984. The EPRF and the OPRF continue to be supplemented each year. Supplements are sold annually and will cumulate until a third 6-year set is available in 1992.

Copies of publications listed on the EPRF and the OPRF may be found in regional depository library collections. Copies of certain technical publications no longer sold by the Superintendent of Documents may be available from:

National Technical Information Service
5285 Port Royal Road
Springfield, VA 22161

There are currently more than 230 *Subject Bibliographies* that list publications and subscriptions on a single subject or a specific field of interest. The bibliographies also provide a brief description of some of the publications and subscriptions listed, ordering information, and the date of imprint of a publication. The Superintendent of Documents has also prepared a *Subject Bibliography Index* to assist customers in selecting the subject bibliography that is most closely related to their needs. FEDERAL DEPOSITORY LIBRARY PROGRAM

The Federal Depository Library Program was established by Congress to provide free public access to Government publications. Nearly 1400 public, academic, State, and law libraries serve as an information link with the Federal Government by maintaining collections of Government publications. These collections, which are tailored to local needs, are open to the public. Fifty of the libraries are designated as regional depository libraries. They have the responsibility of retaining material permanently and providing inter-library loan and reference services in their regions. They also assist the other depository libraries with the disposal of obsolete material.

Copies of documents no longer available through the GPO Sales Program can usually be found in regional depository collections. A complete listing of regional depositories follows. To obtain a complete listing of all depository libraries, write to:

USERS' GUIDE

Catalog Arrangement and Indexes

The bibliographic entries in the *Monthly Catalog* are arranged in Superintendent of Documents classification number order. Each record is also assigned a unique catalog number, which consists of a two-digit prefix representing the catalog year, followed by a sequential number beginning with 1 in the first issue of each year. Within this arrangement, the publications of each Government author are further identified by the name and address of the issuing agency.

Catalog entries may be accessed by the following indexes:

Author index: An alphabetical list of personal authors, editors, co-authors, corporate authors, and conferences.

Title index: An alphabetical list of titles proper, subtitles, and alternate titles.

Subject index: An alphabetical list of subjects derived from the *Library of Congress Subject Headings.*

Series/Report index: An alphabetical listing of series statements and tracings, series numbers, and report numbers.

Contract number index: An alphanumeric list of contract, grant, and project numbers associated with technical report publications.

Stock number index: An alphanumeric list of Superintendent of Documents and other sales stock numbers.

Title keyword index: An alphabetical list of truncated titles, arranged by important words selected from publication titles.

A **margin index** on the back cover locates the seven indexes. Listings in all of the indexes are followed by the catalog entry number, which refers the user to the complete bibliographic citation. Listings in the **title** and **subject indexes** are augmented with the publications' author and classification number to enhance identification and retrieval. Cumulative indexes are published semiannually, annually, and quinquennially, and in addition the indexes listed above, include a **Classification number index** for all the publications listed during the period of cumulation.

Abbreviations

The abbreviations used in the bibliographic records in the catalog are those described in the *Anglo-American Cataloguing Rules,* 2nd ed., and the *GPO Classification Manual: A Practical Guide to the Superintendent of Documents Classification System.*

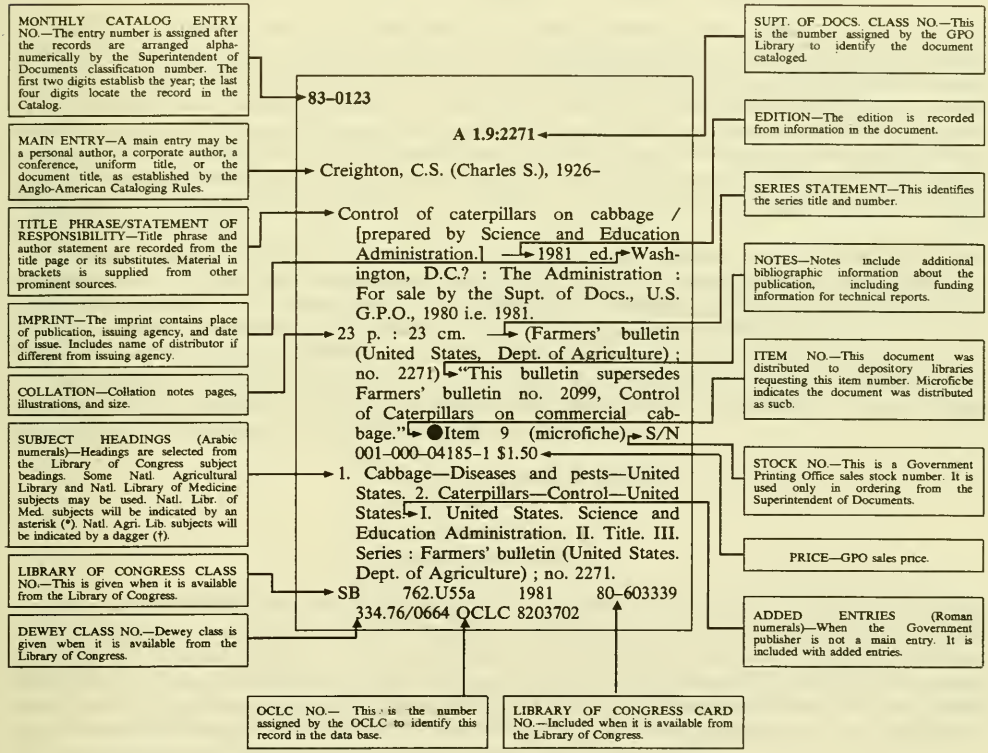

List of Government Authors

This alphabetical list in the preliminary pages of each catalog locates the beginning of the sequence of entries of documents issued by a specific agency. The list is compiled each month and contains only Government authors of documents included in that *Monthly Catalog* issue.

SAMPLE ENTRY

Monthly Catalog descriptive cataloging entries follow the precepts of the *Anglo-American Cataloguing Rules,* 2nd ed., the Library of Congress Rule Interpretations, the *GPO Cataloging Guidelines,* and the several pertinent OCLC format documents. All name and series authorities are in AACR2 format, and are established through the Library of Congress Name Authorities Cooperative Project (NACO). The subject headings used in the GPO cataloging are derived from the *Library of Congress Subject Headings,* 10th ed.

The following sample entry is an artificial, composite record, designed to illustrate the major features of a *Monthly Catalog* bibliographic citation.

The *Out-of-Print GPO Sales Publications Reference File* provides users with access to historical records for publications which were once available through the Sales Program. Two 6-year cumulations have been produced. The first was published in 1980 and is known as the Exhausted GPO Sales Publications Reference File (EPRF). It includes 25,000 items which went out-of-print at GPO between 1972 and 1978. The second, known as the Out-of-Print PRF (OPRF), was published in 1986. It contains 35,000 titles which went out-of-print between 1979 and 1984. The EPRF and the OPRF continue to be supplemented each year. Supplements are sold annually and will cumulate until a third 6-year set is available in 1992.

Copies of publications listed on the EPRF and the OPRF may be found in regional depository library collections. Copies of certain technical publications no longer sold by the Superintendent of Documents may be available from:

FEDERAL DEPOSITORY LIBRARY PROGRAM

The Federal Depository Library Program was established by Congress to provide free public access to Government publications. Nearly 1400 public, academic, State, and law libraries serve as an information link with the Federal Government by maintaining collections of Government publications. These collections, which are tailored to local needs, are open to the public. Fifty of the libraries are designated as regional depository libraries. They have the responsibility of retaining material permanently and providing inter-library loan and reference services in their regions. They also assist the other depository libraries with the disposal of obsolete material.

Copies of documents no longer available through the GPO Sales Program can usually be found in regional depository collections. A complete listing of regional depositories follows. To obtain a complete listing of all depository libraries, write to:

USERS' GUIDE

Catalog Arrangement and Indexes

The bibliographic entries in the *Monthly Catalog* are arranged in Superintendent of Documents classification number order. Each record is also assigned a unique catalog number, which consists of a two-digit prefix representing the catalog year, followed by a sequential number beginning with 1 in the first issue of each year. Within this arrangement, the publications of each Government author are further identified by the name and address of the issuing agency.

Catalog entries may be accessed by the following indexes:

Author index: An alphabetical list of personal authors, editors, co-authors, corporate authors, and conferences.

Title index: An alphabetical list of titles proper, subtitles, and alternate titles.

Subject index: An alphabetical list of subjects derived from the *Library of Congress Subject Headings.*

Series/Report index: An alphabetical listing of series statements and tracings, series numbers, and report numbers.

Contract number index: An alphanumeric list of contract, grant, and project numbers associated with technical report publications.

Stock number index: An alphanumeric list of Superintendent of Documents and other sales stock numbers.

Title keyword index: An alphabetical list of truncated titles, arranged by important words selected from publication titles.

A **margin index** on the back cover locates the seven indexes. Listings in all of the indexes are followed by the catalog entry number, which refers the user to the complete bibliographic citation. Listings in the **title** and **subject indexes** are augmented with the publications' author and classification number to enhance identification and retrieval. Cumulative indexes are published semiannually, annually, and quinquennially, and in addition the indexes listed above, include a **Classification number index** for all the publications listed during the period of cumulation.

Abbreviations

The abbreviations used in the bibliographic records in the catalog are those described in the *Anglo-American Cataloguing Rules,* 2nd ed., and the *GPO Classification Manual: A Practical Guide to the Superintendent of Documents Classification System.*

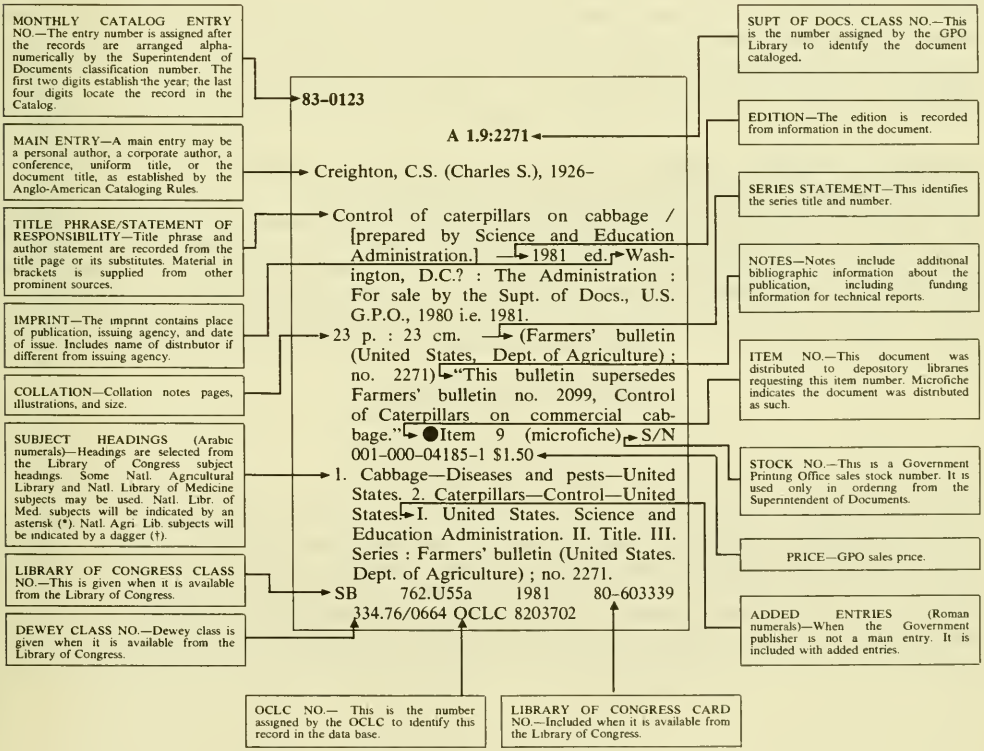

List of Government Authors

This alphabetical list in the preliminary pages of each catalog locates the beginning of the sequence of entries of documents issued by a specific agency. The list is compiled each month and contains only Government authors of documents included in that *Monthly Catalog* issue.

SAMPLE ENTRY

Monthly Catalog descriptive cataloging entries follow the precepts of the *Anglo-American Cataloguing Rules,* 2nd ed., the Library of Congress Rule Interpretations, the *GPO Cataloging Guidelines,* and the several pertinent OCLC format documents. All name and series authorities are in AACR2 format, and are established through the Library of Congress Name Authorities Cooperative Project (NACO). The subject headings used in the GPO cataloging are derived from the *Library of Congress Subject Headings,* 10th ed.

The following sample entry is an artificial, composite record, designed to illustrate the major features of a *Monthly Catalog* bibliographic citation.

The *Out-of-Print GPO Sales Publications Reference File* provides users with access to historical records for publications which were once available through the Sales Program. Two 6-year cumulations have been produced. The first was published in 1980 and is known as the Exhausted GPO Sales Publications Reference File (EPRF). It includes 25,000 items which went out-of-print at GPO between 1972 and 1978. The second, known as the Out-of-Print PRF (OPRF), was published in 1986. It contains 35,000 titles which went out-of-print between 1979 and 1984. The EPRF and the OPRF continue to be supplemented each year. Supplements are sold annually and will cumulate until a third 6-year set is available in 1992.

Copies of publications listed on the EPRF and the OPRF may be found in regional depository library collections. Copies of certain technical publications no longer sold by the Superintendent of Documents may be available from:

FEDERAL DEPOSITORY LIBRARY PROGRAM

The Federal Depository Library Program was established by Congress to provide free public access to Government publications. Nearly 1400 public, academic, State, and law libraries serve as an information link with the Federal Government by maintaining collections of Government publications. These collections, which are tailored to local needs, are open to the public. Fifty of the libraries are designated as regional depository libraries. They have the responsibility of retaining material permanently and providing inter-library loan and reference services in their regions. They also assist the other depository libraries with the disposal of obsolete material.

Copies of documents no longer available through the GPO Sales Program can usually be found in regional depository collections. A complete listing of regional depositories follows. To obtain a complete listing of all depository libraries, write to:
